Structure of the requirements

The structure of the requirements is as follows:

- **Title:** a short title, prepended with the internal ID of the requirement
- **Description:** the requirement text. The specified text will be used to test the implementation.
- **Area:** Apart from more general requirements the requirements are categorized by modules (e.g. STLXML2EBU-TT or EBU-TT2EBU-TT-D)
- **Requirement Review Status:** This is the internal review status of the requirement itself (especially of the requirement text).
- **Status Implementation:** This status indicates if the requirement is already met by the implementation. The possible status codes are:
 - *outstanding* - the corresponding code has not yet been written, or the requirement has been implemented but there are no test files for it
 - *waitingReview* - the code to implement the requirement has been written but nobody (except the developer) has reviewed the code yet
 - *underReview* - the corresponding code is under review and has not yet been accepted by the first reviewer
 - *reviewed* - the corresponding code has been reviewed and accepted by the first reviewer
 - *accepted* - the corresponding code has been accepted by the developer team and is ready to be published
- **Priority according to MoSCoW:** the priority that is the base to decide when the feature will be implemented. The possible values are:
 - *M* - must
 - *S* - should
 - *C* - could
 - *W* - won't

For more information see: https://en.wikipedia.org/wiki/MoSCoW_method

Requirements for Sub-module DFXP2TTML

requirement-2010: Translate all DFXP namespaces to namespace of TTML 1

Description

In a TTML document all namespaces from TTML version "W3C Candidate Recommendation 24 /09/2009" (often referred to as DFXP) are translated to the corresponding namespaces in TTML 1 version "W3C Recommendation 24/09/2013".

Area

DFXP2TTML
